

Making Horse Riding Safer

Products Designed for Safety, Health and the Environment
with QUALITY built in

Equestrian Baglite

A unique and innovative solar-powered, eco-friendly lighting product worn over the shoulders as a light vest to help keep horse riders safe on the roads and bridleways or may be fitted over any backpack or bag worn over the shoulders.

Light Harness

Rear View

As a traditional Baglite

Slotting over the shoulders, Light Harness/Baglite provides super-bright lighting that clearly illuminates riders with no need for batteries. Using a new unique 360 degree floodlight module there is a single red floodlight at the back and two white floodlights at the front. The lights shine out from every angle so horse riders wearing Light Harness/Baglite will be seen clearly by motorists any time day or night from a distance of 1km. The lights can be turned on and off and set to different modes – flashing, constant or off. Although the constant mode is advised to start off with for horse riders, so as not to startle the horses with the flashing mode, testing with young horses has not seen any horses bothered by the flashing lights as they are positioned well away from the line of sight and flash at an appropriate rate.

Perfect for Le Trek

Slotting over any size bag or rucksack, Baglite provides super-bright lighting that clearly illuminates riders and their bags with no need for batteries. There is a single red floodlight at the back and two white floodlights at the front attached to straps that fit to the straps of a backpack. The lights shine out from every angle. The lights can be turned on and off and set to different modes – flashing, constant or off.

Perfect anytime, Summer/Winter, Dawn/Dusk

Light Harness/Baglite provides light that shines out brightly from a position on the body that creates high visibility for motorists and also solves the problem of people not being seen from the side. As the mornings and evenings draw in, Light Harness/Baglite allows horse riders to stay illuminated without worrying about batteries running out or finding an electricity charging point.

The lightweight lights are weather and impact resistant. Simple to fit and so comfortable to wear that you don't know you have them on, they are maintenance free and ensure that horse riders are visible and that cyclists can ride secure in the confidence that they and their horse are clearly visible at all times.

Perfect for the Environment

With over 600 million batteries (22,000 tonnes) being disposed of by UK consumers (source DEFRA) every year, Light Harness/Baglite is an eco-friendly product, that charges both in direct sunlight and in artificial light – at home or in the office or just popped on the windowsill for a few hours at home. It provides over six hours of flashing light from a full charge and provides super bright lights to create strong visibility to road users. The saving on batteries alone means that Light Harness/Baglite enjoys a cost payback as well as helping save the environment.

Light Harness/Baglite's battery free 'green' credentials will appeal to those of us who are environmentally conscious and even Pedalite's packing avoids using unnecessary plastic as it is completely made from recycled cardboard.

Key features of the Baglite are:

- Unique 360 degree floodlight module
- Constant or flashing modes
- Maintenance free – fit and forget
- Fits all sizes of rucksacks and backpacks
- Allows easy access to bags while fitted
- Lightweight and comfortable
- Weather and impact resistant
- Multiple superbright LEDs per module light which floods across the lens as well as directional
- Powered by stored natural and artificial light energy
- No batteries or mains charging required
- Hi visibility reflective strips
- 6+ hours of flashing light from a full charge

Available from online stores, shows and many other good retail stores worldwide, further details available on www.pedalite.com
