Pedalite Pedal Lights:

Somewhat on the other end of the pedal spectrum are [Pedalite](#)'s Pedal Lights. [Pedalite](#)'s 360 Degree Visibility Pedal Lights are unique, battery-free pedal lights for bicycles that have been designed to make cyclists more visible to motorists day and night from any angle, including the side. They provide always-on lighting so if the cyclist's bike light battery runs out, or perhaps they have forgotten their lights, thinking they are not needed in summer, [Pedalite](#) Pedal lights will ensure they are still visible to cars from 1km away and at 360 degree angles.
