Visibly stylish

Be seen on your bike

With winter's dark mornings and evenings with us until the end of March, being seen on the roads is still vital to your safety. However, being visible to traffic doesn't mean that you need to sacrifice every ounce of dignity and sartorial elegance. Have a gander at these standout offerings and leave behind the fluorescent "lollipop lady" look.

Flashy pedals

Three flashing LEDs housed within the pedal body and powered by you pedalling your bike are a great innovative product. They even continue to flash while stopped at the traffic lights for up to five minutes – perfect for the commuter or for children who ride to school. Toe clips sold separately.

Pedalite pedals £34.99; www.pedalite.com
